

We help scientists develop discoveries into innovations

At Umeå Biotech Incubator we offer a welcoming and inspiring environment. We are a life science incubator in the science park right next to Umeå University, where excellent science is transformed to innovations. Whether you are in need of an office or a well-equipped lab for an existing project, we can offer you both long and short term tenancy agreements.

Friendly climate and professional support

Having Umeå Biotech Incubator as your workplace means being part of an innovative culture. You will work among friendly colleagues and have access to professional support on a daily basis.

Flexible deals adjusted to your needs

We believe that realizing scientific ideas should be possible and affordable. Therefore, we house a selection of modern labs suitable for anything from molecular biology to electronics or mechanics. Our rentable spaces can be tailored to your needs and our tenancy agreements are flexible and scalable. This allows you to partner up with additional colleagues and comfortably expand your business at your own pace.

High level of security and privacy

To keep your work safe our premises are locked at all times and secured with alarms after office hours. In addition, each private office and lab-space is lockable for your convenience.

Bring us your idea - and we can provide facilities, facts and financing

Besides offering great facilities, we offer professional lab services and we also have access to all the expertise you need in order to explore the potential of your ideas.

Our professional support include IP investigations, experimental study design consultations, market strategy and brand development and hands-on laboratory services if needed.

In addition, we can offer direct funding for our cases through our unique early verification step, in collaboration with Umeå University Holding and the Ehrling-Persson Family Foundation.
